EDUCATION

Harbin Institute of Technology *August 2019 - June 2023*
Undergraduate, Computer Science Overall Score: 91.95/100
Selected Courses: Pattern Recognition and Deep Learning (96.7) Calculus B (92) Linear Algebra and Analytic Geometry (95) Probability and Statistics (96) Software Construction (95.2)

KTH Royal Institute of Technology *August 2023 - June 2025*
Graduate, Machine Learning

INTERNSHIPS

Tsinghua University *Department of Electronic Engineering* Beijing, China
Baidu Research *Business Intelligence Lab* *June 2022-October 2022*
Research Intern (Adviser: Prof. Quanming Yao and Dr. Yaqing Wang)

- Investigated recent academic research on few-shot learning and few-shot link prediction. Engaging in the improvement of few-shot link prediction methods.

Harbin Institute of Technology *Massive Data Computing Center* Harbin, China
Research Assistant (Adviser: Prof. Hongzhi Wang) *January 2021-May 2022*

- Assisted with research on applications of AutoML, including an easy-to-use optimizable AutoML system, and AutoML methods applied to model compression, federated learning and click-through rate prediction. The results can be found in the publication section.

PREPRINTS AND PUBLICATONS

1.Chunnan Wang, Hongzhi Wang, Xu Bo, Xintong Song, **Xiangyu Shi**, Yuhao Bao. CO-AutoML: An Optimizable Automated Machine Learning System [link] *Accepted by DASFAA2022 Demo Track*

- We developed an optimizable AutoML system, which can continuously optimize the search space.
- I was responsible for the development of system interface.

2.Chunnan Wang, Hongzhi Wang, **Xiangyu Shi**. AutoMC: Automated Model Compression based on Knowledge Graph and Progressive search strategy [arxiv] *Submitted to TKDE*

- We proposed an automatic tool for model compression with a progressive search strategy.
- I was responsible for the code and the experiments.

3.Chunnan Wang, **Xiangyu Shi**, Hongzhi Wang. Fair Federated Learning with Multi-Objective HPO *Submitted to TKDD*

- We proposed to improve the process of aggregating in federated learning by an AutoML technique.
- I was responsible for the code and the full paper writing.

4.Chunnan Wang, Chen Liang, Hongzhi Wang, **Xiangyu Shi**. Automated Click-Through Rate Prediction Model Integration *Submitted to TKDD*

- We proposed a automatic tool that can efficiently generate the best CTR model integration scheme.
- I was responsible for the paper writing of related works.

HONORS AND FELLOWSHIPS

National Olympiad in Informatics in Provinces (NOIP), First Award, Top 30 *November 2017*
International Informatics Olympiad China Team Selection Competition (CTSC), Third Prize *May 2018*
Second Prize of People's Scholarship, Top %7 *Septemper 2020, Septemper 2021*
Outstanding Students of 2019∼2020 *December 2020*
